Lab-session 8

1. Re-do questions 2), 3) and 4) from Lab-session 6 substituting all IF structures by SELECT CASE structures. You can find the solutions to Lab-session 6 in the module's web page[1]

2. If you have any time left try to complete all previous Lab sheets (in case you did not manage to finish them during the corresponding Lab session).

3. If you have done everything, you may have a look at previous years exams papers and see if you would be able to solve the questions there[2].
